Defining and using variables

name is thing

x = 3.14159265 number

s = "hello" string

y = x another variable

x = a + b binary operation

x *= 10 assignment operator

text s x y 2 variable use

Binary operators

x = a + b

x = a - b

x = a * b

x = a / b

addition

subtraction

multiplication

division

Assignment operators

x += 10

x -= 10

x *= 10

x /= 10

increase x by 10

decrease x by 10

multiply x by 10

divide x by 10

Variables and Assignments

```
// assign 10 to x
                 x = 10
     Using variables
                                // assign 80.45 to y
                  y=80.45
                  size=x/5
                              // x divided by 5 to size
                  s="Hello" // s has the string value 'Hello'
                  text s x y size // Use the variables
   Binary operations
                  a=100+200.7 // addition
                                  // subtraction
                  a = x - 10
                                  // multiplication
                  a=x*10
                  a=x/y
                                  // division
Assignment operations
                                  // increase x by 10
                  x + = 10
                                   // decrease x by 10
                  x = 10
                                   // multiply x by 10
                  x*=10
                                   // divide x by value of y
                  x/=y
```
